

Integrated Management Policy

In line with the expectations of our customers and stakeholders; Our basic principle is to provide products and services, to follow new technologies, to manage risks and opportunities effectively, to ensure continuous improvement and development.

In order to realize this principle:

- We will create and develop appropriate management systems structure by evaluating National and Local Legal Regulations, Customer Special Requests and Quality & Environment & OHS conditions,
- We will produce our products and services with the highest quality and efficiency by communicating effectively with our customers in line with our customer-oriented management approach,
- We will carry out activities to raise awareness in order to finalize our work on time and with the right quality by adopting our Quality Management System, which we have created with a value-oriented production approach, to all our employees and related parties,
- We will ensure that a clean and healthy environment sensitive to climate change is transferred to future generations,
- We will manage recycling and reuse activities by ensuring the efficient use of natural resources, reducing and decomposing the wastes that may occur during our activities,
- By constantly improving our Occupational Health and Safety culture, we will carry out activities aimed at achieving the sustainable "Zero Occupational Accident and Occupational Disease" target,
- By creating a safe and healthy and clean working environment, we will endeavor to ensure that our employees live a happy life with their families,

We commit.
